## Summary

---

Junior QA Engineer skilled in manual & automation testing (Playwright, Selenium, Katalon). Experienced in API testing, CI/CD pipelines, and Agile collaboration. Strong debugging, analytical, and problem-solving skills with solid web development background.

## Education

---

### Bachelor of Informatics Engineering — Institut Teknologi Telkom Purwokerto

Aug 2019 – May 2024 | GPA: 3.44/4.0

- Final project: Blockchain-based NFT ticketing system for music events.

## Work Experiences

---

### Puskomedia Indonesia Kreatif

Purwokerto, Indonesia

#### Web Developer - Intern

Aug 2022 – Sep 2022

- Developed & tested geolocation features on Panda SID (Sistem Informasi Desa), reducing bug reports before deployment.
- Optimized SQL queries and validated PKH feature data visualization (Laravel + Highcharts).
- Conducted manual testing & code reviews to ensure feature stability prior to deployment.

## Projects

---

### • POS System – Automation Testing | Playwright

Automated 20+ positive & negative test cases covering login, product search, cart, and checkout. Improved regression testing efficiency through reusable fixtures & Page Object Model (POM).

### • FakeStoreAPI – API Testing | Playwright

Built API automation suite for login, products, and cart using Playwright fixtures & POM. Generated HTML & Allure reports to improve visibility of test results.

## Skills

---

- **QA & Tools:** Playwright, Selenium, Katalon Studio, Postman, JIRA, GitHub Actions
- **Testing Types:** Manual Testing, Functional, Regression, API Testing, End-to-End
- **Programming:** JavaScript, TypeScript, React.js, Next.js, TailwindCSS
- **Other:** Git, CI/CD pipelines
- **Skills:** Analytical Thinking, Attention to Detail, Problem Solving, Team Collaboration
- **Languages:** Indonesian (Fluent), English (Intermediate)

## Certifications

---

- **Purwadhika Digital Technology School — QA Engineer Program** ( *Jun 2025 – Aug 2025*)

Manual & automation testing (Playwright, Selenium, Katalon), Applied Agile workflow with JIRA, Final project: End-to-end QA process simulation.
